Feedback Analysis

(2022-2023)

1. Introduction :

In view of quality enhancement and maintaining the standard of higher education at our institute, Taywade College, Koradi, the feedback committee is established by IQAC in Academic Council of the college for the session 2022-23. The feedback about infrastructural facilities, teaching quality of each faculty has been collected from students. The feedback about quality of curriculum has been collected from alumni of the college, students and employer. The feedback about the overall development of students has been collected from parents by the committee in the form of questionnaire. The various points of infrastructural facilities such as classrooms, library, administrative office, sports facilities and other amenities available in institute are incorporated in questionnaire. Some important characteristics features of quality teacher are included to evaluate the teaching quality of faculty. In feedback about curriculum the size, relevance, need base applicability, employability, skill development, individual satisfaction level and fulfilment in developing social aspect after learning specific syllabus of the course have been included in the feedback format for students, teachers, alumni and employers. The feedback taken from parents included their satisfaction level with respect to overall development of their ward, infrastructural facilities provided by institution, administration and discipline of the institution and adequacy and applicability of the course content.

2. Methodology :

The well-structured feedback questionnaire about syllabus and its transaction has been provided through google forms. An analysis made on the responses obtained online from the stakeholders to check the quality of prescribed syllabus and expectations of students, alumni, employers, teachers and parents on 1-5 points scale namely Excellent (5), Very Good (4), Good (3), Average (2) and poor (1).

Analysis of Data and Result

The feedback committee analyse the feedback obtained from the students, alumni, employer, teacher and parents by using statistical and graphical methods. Every individual teacher has been graded based on average score obtained on 1-5 point scale as Excellent (90-100%), Very good (70-80%), Good (50-60%), satisfactory (30-40%) and Poor (00-20%). The entire faculty members scored Very good to Excellent.

Analysis of infrastructural facilities done by committee and its pictorial report is submitted to Principal. The overall infrastructural facilities are of good quality.

The analysis of quality of curriculum prescribed by university was done by committee on the basis of responses obtained from students, teachers, alumni and employer. The students are well satisfied with the content of the syllabus and their need. Teachers has their gross opinion that there is no need to make remarkable changes in syllabus. Alumni observed a lot of changes in present syllabus to meet the present global scenario and cutting age requirement than the

syllabus they studied at their time. The employers were of opinion that the present syllabus is good enough to produce employable youths and responsible human resource.

The committee also made statistical analysis of the feedback of parent responses obtained and come to the conclusion that the parents are quite satisfied and happy with the institution with respect to infrastructural facilities, overall course content of syllabus, curricular and co-curricular activities conducted by institute, overall development of their ward and discipline of institute.
